

Java/JEE Developer

Job description :

As part of our client's development, the INTM Group is looking for a JAVA/JEE Developer.

Within the technical teams, your duties will be the following:

- Analyze the business needs;
- Participate in the design of the software architecture;
- Maintain existing code and/or develop new applications or features in JAVA/JEE;
- Carry out tests and corrections of applications.

Profile description :

With a higher education in computer science and a level Bac+5, you have a minimum of 2 years' experience in a similar position.

Your level of English is operational.

The INTM Group is looking for a passionate, curious, agile, rigorous and autonomous person.

Although they can be a plus, we are not fixed on the following:

- Knowledge of one or more Javascript frameworks (Node, Angular, etc.);
- Knowledge of Hibernate, Spring, Struts;
- Agile methodology.

Do you meet these qualities and want to make a leap in your career path? Then don't wait any longer, this assignment is made for you!

This position is open to people with disabilities.
