

Mainframe Design and Development Engineer

To support our key account customers on large-scale projects, the INTM Group is looking for new talents who will evolve through various stimulating assignments.

Job description :

As a Mainframe Design and Development Engineer, you will be immersed in qualified and experienced teams. You will contribute to the realization of our customers' projects through the application of your knowledge, experience and skills.

As part of your assignment you will be involved in the following phases:

- Functional / Technical analysis;
- Design;
- Carrying out specific developments;
- Developing the test strategy and realization;
- Putting into production;
- Tracking and treating anomalies.

Technical skills required: COBOL, CICS, DB2, JCL.

Profile description :

With a higher education in computer science, you have at least 3 years of experience in a similar position. Your level of English is operational.

You are above all a person who is passionate about the world of IT, curious, and motivated by teamwork.

This position is open to people with disabilities.
